

ISO 27001 – Information Security Risk Assessment Project

This project demonstrates a professional, fresher-level implementation of an ISO/IEC 27001 based Information Security Risk Assessment for a simulated IT organization.

Objectives:

- Identify information assets
- Analyze threats and vulnerabilities
- Perform qualitative risk assessment
- Map risks with ISO 27001 Annex A controls
- Propose risk treatment plans

Tools Used: ISO/IEC 27001, MS Excel, MS Word/PDF, MS PowerPoint
